## SKILLS

- HTML
- CSS: / [Flex-blox](#) / [Grid](#) / [Animations](#) / [Media Queries](#).
- Javascript: / [ES5](#) / [ES6](#).
- SASS
- React: / [Hooks](#) / [Context](#) / [React-router](#) / [React-redux](#).
- NPM
- Dev-Tools

## SUMMARY

Why did I choose this career? It is easy to answer, technology advances in giant steps. In 2011 I was studying Video Game Engineering and that was where I first learned a little about web technologies. Back then I learned basics about HTML, CSS, bootstrap and foundation. For personal reasons I had to stop my studies and that was where I made my first mistake of moving away from programming.

When I saw how many technologies were available to develop web, I honestly felt overwhelmed, I felt that I couldn't anymore, but I had no other option, it was to learn or go back to work as a doordash delivery.

## HOBBIES

- Video Games: / [Halo](#) / [Starcraft](#) / [Skyline Cities](#) / [Forza](#).
- Sometimes I like take pictures and play with design programs.
- Curiosities about the origin.
- Animes: / [Full Metal Alchemist](#) / [Attack on Titan](#) / [Naruto](#) / [Monster](#)
- Lately I learning how the world of cryptocurrencies works
- Go for a walk ins the afternoon helps me a lot to clear my mind
- Lecture
